Microsoft Visual Studio Scrum 1.0

- Visual Studio Scrum 1.0 is a *Scrum* process template
- In contrast, MSF 5.0 for Agile Software Development is an Agile process template
 - It can be used to apply a variety of Agile practices and methodologies including Scrum
- You could say that the Scrum template is a specific subset of the Agile template in many ways

Installation

- Download the template
- Run the .msi
- Install the SharePoint template manually
- Upload the process template to your Team Project Collection(s)
- Refer to the text file inside the .msi if necessary

Visual Studio Scrum 1.0 Artifacts

Work Item Types	Team Queries	Reports
Sprint	All Sprints	Release Burndown
Product Backlog Item	Product Backlog	Sprint Burndown
Task	Blocked Tasks	Velocity
Impediment	Open Impediments	Build Success Over Time *
Bug	Sprint Backlog	Build Summary *
Test Case *	Test Cases	Test Case Readiness *
Shared Steps *	Unfinished Work	Test Plan Progress *
	Work in Progress	

* Nearly identical to that found in the MSF for Agile Software Development 5.0 template
